About us

The AI Society at Arizona State University (AIS) is the university's premier community dedicated to democratizing artificial intelligence education and fostering a community of innovators. Guided by our vision of inspiring excellence, equity, and innovation in AI at ASU, we aim to bridge the gap between academia and real-world application and empower students from diverse disciplines.

Our mission is to learn, collaborate, and innovate through multiple programs, including technical workshops, community discussion spaces, and the AI MakerSpace, where student teams work with mentors to develop AI-focused projects. AIS teams have also earned recognition beyond campus, winning multiple hackathons that highlight both technical expertise and creativity.

AIS on A Mountain,

The AI Summit

AI Summit,

Artificial Intelligence (AI) is no longer just a buzzword. It's transforming the way we learn, work, and build in real time. The AI Summit aims to bring that transformation into focus, creating a space where students, professionals, and innovators can explore what AI actually means for their futures. From live demonstrations to keynote discussions

However, the rapid growth of AI has sparked mixed reactions. Some attendees are excited about the possibilities AI creates, from launching smarter startups to accelerating research and productivity. "AI feels like a superpower if you know how to use it," said one student planning to attend. Others approach the topic with more caution.

Welcome to AI Summit
